

Hands Free Bolting Flange Alignment Pin

Flange Alignment Pins compensate for the misalignment of bolt holes. The Flange Alignment Pins available from HTL are designed with a tapered end, allowing access to offset bolt holes and when simply turned 180°, the Pin aligns the two bolt holes together.

Eliminating the requirement for a hammer, Flange Alignment Pins increase onsite safety and speed up bolting processes.

With a safety tether attachment feature included, you can add the Flange Alignment Safety Kit to ensure that the tool can be tethered, preventing dropped objects.

Boxed Sets

The Flange Alignment Pins are also available in boxed sets. The Boxed Sets come in Small, Medium and Large Flange Alignment Pin sizes and are supplied in a handy carry case that provides durable storage.
